Office Action Summary

Application No.

09/916,895

Applicant(s)

NEWSOME, MARK R.

Examiner

LaShonda T Jacobs

Art Unit

2157

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 July 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-49 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-49 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: note reference numeral 206 in Figure 2 and reference numeral 300 in Figure 3. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2157

3. Claims 1-2, 6-8, 11-16, 21-28, 31-34, 37-40 and 45-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dodrill et al (hereinafter, "Dodrill", 6,766,298) in view of Mogul et al (hereinafter, "Mogul", 6,243,761).

As per claim 1, Dodrill discloses a method for adjusting operation of an application of a server during operation of the server, comprising the steps of:

- preparing a file in a tag-based language format wherein the file includes a desired change in operation of the application (col. 5, lines 39-50, col. 7, lines 7-14 and col. 11, lines 17-41); and
- sending the file in the XML format to the server (col. 8, lines 6-24).

However, Dodrill does not explicitly disclose:

- dynamically changing the application during server operation by implementing the file in the tag-based language format via a control panel that is coupled to the server.

Mogul discloses a method for dynamically adjusting multimedia content of a web page by a server including:

- dynamically changing the application during server operation by implementing the file in the tag-based language format via a control panel that is coupled to the server (abstract, col. 4, lines 25-27, lines 64-67 and col. 5, lines 47-57).

Given the teaching of Mogul, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Dodrill by allowing the server to adjust the content of data to actual network conditions in order to send data to the client in a timely and efficient manner.

As per claims **15** and **39**, Dodrill discloses the invention substantially as claims discussed above:

However, Dodrill does not explicitly disclose:

- using a servlet as a form-based interface to a server wherein the servlet includes a desired change in operation of the application as a file in a tag-based language format; and
- dynamically changing the application during server operation by implementing the file in the tag-based language format via a control panel that is coupled to the server.

Mogul discloses a method for dynamically adjusting multimedia content of a web page by a server including:

- using a servlet as a form-based interface to a server wherein the servlet includes a desired change in operation of the application as a file in a tag-based language format (abstract, col. 4, lines 25-27, lines 64-67 and col. 5, lines 47-57); and
- dynamically changing the application during server operation by implementing the file in the tag-based language format via a control panel that is coupled to the server (abstract, col. 4, lines 25-27, lines 64-67 and col. 5, lines 47-57).

Given the teaching of Mogul, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Dodrill by allowing the server to adjust the content of data to actual network conditions in order to send data to the client in a timely and efficient manner.

As per claim **27**, discloses a dynamically adjustable server comprising:

- a computer, coupled to the Internet and having at least a processor with a tag-based language format engine (col. 8, lines 6-24).

However, Dodrill does not explicitly disclose:

- a memory coupled to the processor and having stored thereon at least a set of files for each selected supported service and a control unit arranged to communicate with the processor, for providing instructions for dynamically adjusting at least one file for at least one application.

Mogul discloses a method for dynamically adjusting multimedia content of a web page by a server including:

- a memory coupled to the processor and having stored thereon at least a set of files for each selected supported service and a control unit arranged to communicate with the processor, for providing instructions for dynamically adjusting at least one file for at least one application (abstract, col. 4, lines 25-27, lines 64-67 and col. 5, lines 47-57).

Given the teaching of Mogul, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Dodrill by allowing the server to adjust the content of data to actual network conditions in order to send data to the client in a timely and efficient manner.

As per claims 2, 16, 28 and 40, Dodrill discloses wherein the tag-based language format is one of:

- an eXtensible Markup Language (XML) format, a ColdFusion Markup Language (CFML) format and a Wireless Markup Language (WML) format (col. 9, lines 65-67 and col. 10, lines 1-12).

Art Unit: 2157

As per claim 31, Dodrill discloses the invention substantially as claims discussed above.

However, Dodrill does not explicitly disclose:

- wherein at least one of the set of files is dynamically adjustable using instructions in the tag-based language format.

Mogul discloses a method for dynamically adjusting multimedia content of a web page by a server including:

- wherein at least one of the set of files is dynamically adjustable using instructions in the tag-based language format (abstract, col. 4, lines 25-27, lines 64-67 and col. 5, lines 47-57).

Given the teaching of Mogul, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Dodrill by allowing the server to adjust the content of data to actual network conditions in order to send data to the client in a timely and efficient manner.

As per claims 6, 21, 32 and 45, Dodrill discloses:

- wherein the file in the tag-based language format is a log file (col. 11, lines 42-52).

As per claims 7, 22, 33 and 46, Dodrill discloses:

- wherein the log file includes diagnostic information (col. 11, lines 42-58).

As per claim 8, Dodrill discloses:

- wherein the file in the tag-based language format is a log file and the step of preparing the file in the tag-based language format (col. 11, lines 42-58).

However, Dodrill does not explicitly disclose:

- placing the log file in a control panel servlet (applet) prior to sending the file to the server.

Mogul discloses a method for dynamically adjusting multimedia content of a web page by a server including:

- placing the log file in a control panel servlet (applet) prior to sending the file to the server (abstract, col. 4, lines 25-27, lines 64-67 and col. 5, lines 47-57).

Given the teaching of Mogul, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Dodrill by incorporating an applet within the web page to transfer information to the client in a timely and efficient manner.

As per claims 11, 23 and 47, Dodrill discloses the invention substantially as claims discussed above.

However, Dodrill does not explicitly disclose:

- wherein the application is a logging application and the step of dynamically changing the application includes dynamically changing a logging level of the application.

Mogul discloses a method for dynamically adjusting multimedia content of a web page by a server including:

- wherein the application is a logging application and the step of dynamically changing the application includes dynamically changing a logging level of the application (abstract, col. 4, lines 25-27, lines 64-67 and col. 5, lines 47-57).

Given the teaching of Mogul, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Dodrill by allowing the server to adjust the content

of data to actual network conditions in order to send data to the client in a timely and efficient manner.

As per claims 12 and 24, Dodrill discloses:

- wherein the file in the tag-based language format includes at least one desired change in operation of at least one other application (col. 11, lines 42-58 and col. 13, lines 31-51).

As per claims 13 and 25, Dodrill discloses the invention substantially as claims discussed above.

However, Dodrill does not explicitly disclose:

- dynamically changing the at least one other application during server operation by implementing the file in the tag-based language format via a control panel that is coupled to the server.

Mogul discloses a method for dynamically adjusting multimedia content of a web page by a server including:

- dynamically changing the at least one other application during server operation by implementing the file in the tag-based language format via a control panel that is coupled to the server (abstract, col. 4, lines 25-27, lines 64-67 and col. 5, lines 47-57).

Given the teaching of Mogul, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Dodrill by allowing the server to adjust the content of data to actual network conditions in order to send data to the client in a timely and efficient manner.

As per claims 14 and 26, Dodrill discloses the invention substantially as claims discussed above.

However, Dodrill does not explicitly disclose:

- wherein dynamically changing the at least one other application during server operation includes dynamically changing a logging level of the at least one other application.

Mogul discloses a method for dynamically adjusting multimedia content of a web page by a server including:

- wherein dynamically changing the at least one other application during server operation includes dynamically changing a logging level of the at least one other application (abstract, col. 4, lines 25-27, lines 64-67 and col. 5, lines 47-57).

Given the teaching of Mogul, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Dodrill by allowing the server to adjust the content of data to actual network conditions in order to send data to the client in a timely and efficient manner.

As per claim 34, Dodrill discloses:

- wherein the file in the tag-based language format is a log file (col. 11, lines 42-52).

However, Dodrill does not explicitly disclose:

- dynamically adjusted by a servlet file sent from a control panel.

Mogul discloses a method for dynamically adjusting multimedia content of a web page by a server including:

- dynamically adjusted by a servlet file sent from a control panel (abstract, col. 4, lines 25-27, lines 64-67 and col. 5, lines 47-57).

Given the teaching of Mogul, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Dodrill by allowing the server to adjust the content

of data to actual network conditions in order to send data to the client in a timely and efficient manner.

As per claim 37, Dodrill discloses:

- wherein the instructions are implemented by a logging application and a logging level is dynamically changed (col. 11, lines 42-52).

As per claim 38, Dodrill discloses:

- wherein the file in the tag-based language format includes at least one desired change in operation of at least one other application (col. 11, lines 42-52 and col. 13, lines 31-51).

As per claim 48, Dodrill discloses:

- wherein the file in the tag-based language format includes at least one desired change in operation of at least one other server application (col. 11, lines 42-52 and col. 13, lines 31-51).

However, Dodrill does not explicitly disclose:

- dynamically changes the at least one other server application during server operation by implementing the file in the tag-based language format.

Mogul discloses a method for dynamically adjusting multimedia content of a web page by a server including:

- dynamically adjusted by a servlet file sent from a control panel (abstract, col. 4, lines 25-27, lines 64-67 and col. 5, lines 47-57).

Given the teaching of Mogul, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Dodrill by allowing the server to adjust the content

Art Unit: 2157

of data to actual network conditions in order to send data to the client in a timely and efficient manner.

As per claim 49, Dodrill discloses:

- wherein a logging level of the at least one other server application is changed (col. 11, lines 42-52).

4. Claims 3-5, 18-20, 29-30 and 42-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dodrill in view of Mogul and in further view of Yalcinalp.

As per claims 3, 18 and 42, Dodrill in view of Mogul discloses the invention substantially as claims discussed above.

However, Dodrill in view of Mogul does not explicitly disclose wherein the file in the tag-based language format includes:

- a style sheet.

Yalcinalp discloses a system and method for extending the capabilities of an XSL style sheet to include components for content transformation including:

- wherein the file in the tag-based language format includes a style sheet (col. 1, lines 30-42, col. 5, lines 37-44 and col. 6, lines 49-57).

Given the teaching of Yalcinalp, it would have been obvious to one of ordinary skill in the art to modify the system of Dodrill and Mogul by specifying that the XML documents includes a style sheet to aid in the modification of document information to be displayed.

As per claims 4, 19 and 43, Dodrill in view of Mogul discloses the invention substantially as claims discussed above.

However, Dodrill in view of Mogul does not explicitly disclose:

- wherein the style sheet is in eXtensible Style Language (XSL) and the file is in XML format.

Yalcinalp discloses a system and method for extending the capabilities of an XSL style sheet to include components for content transformation including:

- wherein the style sheet is in eXtensible Style Language (XSL) and the file is in XML format (col. 1, lines 30-42, col. 5, lines 37-44 and col. 6, lines 49-57).

Given the teaching of Yalcinalp, it would have been obvious to one of ordinary skill in the art to modify the system of Dodrill and Mogul by specifying that the XML documents includes a style sheet to aid in the modification of document information to be displayed.

As per claim **29**, Dodrill in view of Mogul discloses the invention substantially as claims discussed above.

However, Dodrill in view of Mogul does not explicitly disclose:

- wherein at least one of the set of files is in XML format and is dynamically adjustable using instructions in eXtensible Style Language (XSL) format.

Yalcinalp discloses a system and method for extending the capabilities of an XSL-style sheet to include components for content transformation including:

- wherein the style sheet is in eXtensible Style Language (XSL) and the file is in XML format (col. 1, lines 30-42, col. 5, lines 37-44 and col. 6, lines 49-57).

Given the teaching of Yalcinalp, it would have been obvious to one of ordinary skill in the art to modify the system of Dodrill and Mogul by specifying that the XML documents includes a style sheet to aid in the modification of document information to be displayed.

As per claims **5, 20, 30** and **44**, Dodrill discloses:

- permit a user to examine contents of a desired file remotely, generate at least one custom question, and generate at least one secure question, and remotely adjust the desired file (col. 10, lines 37-51).

5. Claims **9-10, 17, 35-36** and **41** are rejected under 35 U.S.C. 103(a) as being unpatentable over Dodrill in view of Mogul and in further view of Myerson.

As per claims **9** and **35**, Dodrill in view of Mogul discloses the invention substantially as claims discussed above.

However, Dodrill in view of Mogul does not explicitly disclose:

- permitting a user to query log interface information from a web browser.

Myerson discloses a system and method for analyzing a Web site log file and generating an expanded log file including:

- permitting a user to query log interface information from a web browser (abstract, col. 4, lines 7-14, lines 35-46).

Given the teaching of Myerson, it would have been obvious to one of ordinary skill in the art to modify Dodrill in view of Mogul to allow a user to access and view reports regarding web patterns of clients in a timely and efficient manner.

As per claims **10** and **36**, Dodrill in view of Mogul discloses the invention substantially as claims discussed above.

However, Dodrill in view of Mogul does not explicitly disclose:

- permitting a user to filter log interface information from a web browser.

Myerson discloses a system and method for analyzing a Web site log file and generating an expanded log file including:

- permitting a user to filter log interface information from a web browser (abstract, col. 4, lines 7-14, lines 35-46).

Given the teaching of Myerson, it would have been obvious to one of ordinary skill in the art to modify Dodrill in view of Mogul to allow a user to access and view reports regarding web patterns of clients in a timely and efficient manner.

As per claims 17 and 41, Dodrill in view of Mogul discloses the invention substantially as claims discussed above.

However, Dodrill in view of Mogul does not explicitly disclose:

- wherein the forms-based interface permits at least one of: querying log interface information from a web browser and filtering log interface information from a web browser.

Myerson discloses a system and method for analyzing a Web site log file and generating an expanded log file including:

- wherein the forms-based interface permits at least one of: querying log interface information from a web browser and filtering log interface information from a web browser (abstract, col. 4, lines 7-14, lines 35-46).

Given the teaching of Myerson, it would have been obvious to one of ordinary skill in the art to modify Dodrill in view of Mogul to allow a user to access and view reports regarding web patterns of clients in a timely and efficient manner.

Art Unit: 2157

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pat. No. 6,578,000 to Dodrill et al

U.S. Pat. No. 6,715,129 to Hind et al
